

Invention Allows For Quicker, Easier Tire Winterization (JMC-1957)

Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, Pro-Traxx, in the hopes of a good faith review.

PITTSBURGH ([PRWEB](#)) November 08, 2017 -- It tends to be expensive to have snow tires put on and taken off each year. After experiencing an expensive hassle replacing the tires of his car, an inventor from Richland, Wash., decided that there should be an alternative way to winterize tires.

He designed and created a prototype of the PRO-TRAXX to meet this need. It enables a user to winterize vehicle tires more quickly and easily. It also eliminates the need for professional service. Overall, it saves time, effort and money.

Ergonomic and easy to use, PRO TRAXX prevents the strain and hassle of jacking up the vehicle and changing the tires in the conventional manner, making it ideal for all vehicle owners.

The original design was submitted to the National Sales office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-JMC-1957, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
