

DUAL TINT WINDOWS Invented by InventHelp Inventor (LGI-2403)

InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, the DUAL TINT WINDOWS to applicable companies for their consideration.

PITTSBURGH ([PRWEB](#)) November 09, 2017 -- “I thought there could be a better way to filter out bright sunlight when driving,” said an inventor, from Queens Village, N.Y., “so I invented the DUAL TINT WINDOWS.”

The DUAL TINT WINDOWS provide an effective way to prevent bright sunlight from entering the sides of a vehicle. In doing so, they offer an improved alternative to traditional vehicle windows and shades. As a result, they enhance safety and privacy and they could provide added protection and comfort. The invention features a practical design that is convenient and easy to use so it is ideal for vehicle owners. Additionally, the DUAL TINT WINDOWS are producible in design variations.

The inventor described the invention design. “My design could make a vehicle’s interior more comfortable and enjoyable.”

The original design was submitted to the Long Island office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-LGI-2403, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
