

Inventor Develops Automotive Safety Accessory for Young Children (OLC-269)

InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, the Baby Reminder, to applicable companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) November 13, 2017 -- "Too many children die each year because they are left in hot vehicles unattended," said an inventor from Stillwater, Okla. "To prevent these tragic deaths, I came up with this safety system."

He created a prototype for the patent-pending BABY REMINDER to remind the driver that a child is in the back seat. The accessory ensures that the driver takes the child along when exiting the vehicle. This prevents children from being left unattended in a hot vehicle, which is designed to enhance personal safety. It also provides added peace of mind. Furthermore, the invention is adaptable for use with any new or existing vehicle.

The original design was submitted to the Oklahoma City office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-OLC-269, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
