

InventHelp Inventor Develops More Efficient Snow/Ice Removal Tool (IPL-256)

Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, the SNOW AND ICE MELTER in the hopes of a good faith review.

PITTSBURGH ([PRWEB](#)) November 13, 2017 -- "I was tired of getting stuck in the snow and ice in my car," said an inventor from Indianapolis, Ind. "I wanted a quicker, easier way to clear ice and snow from the wheel wells, windshields and windows. For this reason, I came up with an efficient and convenient hand tool."

He developed the SNOW AND ICE MELTER to offer a quick and easy way to clear ice and snow accumulation from wheel wells, windshields and windows. The design eliminates the need to use a manual scraper. It ensures that the vehicle is prepared for winter-weather travel. The accessory saves time and effort when readying the vehicle. All of this provides added peace of mind. In addition, the unit features a compact, easily portable design that can remain in the vehicle for use when needed.

The original design was submitted to the Indianapolis office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-IPL-256, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
