

Inventor Develops Convenient Cleaner for Automotive Underbody (BTM-2396)

InventHelp, a leading inventor service company, is working to submit Portable Underbody Car Wash to companies for their review.

PITTSBURGH ([PRWEB](#)) November 14, 2017 -- An inventor, from Preston, Md., thought there needed to be an easier way to clean salt residue, mud and road grime from a car's undercarriage, so he invented the patent-pending PORTABLE UNDERBODY CAR WASH.

The PORTABLE UNDERBODY CAR WASH provides an effective way to clean the underside of a vehicle. In doing so, it eliminates the need to kneel on the ground. As a result, it enhances comfort. The invention features a portable design that is convenient and easy to use so it is ideal for vehicle owners. Additionally, the PORTABLE UNDERBODY CAR WASH is producible in design variations and a prototype is available.

The inventor described the invention design. "My design helps to prevent back stress and fatigue while washing under the car."

The original design was submitted to the Baltimore office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-BTM-2396, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
