

## **Inventor Develops Trailer Enhancement (ORD-2519)**

*InventHelp, a leading inventor service company, is working to submit Trailer Enhancement Kit to companies for their review.*

PITTSBURGH ([PRWEB](#)) November 15, 2017 -- "When I first bought a trailer I used it for dirt loading and dumping," said an inventor from Umatilla, Fla. "It was a real pain having to manually manipulate the trailer tongue with a hand crank to lift and lower it. For this reason, I came up with a simpler, easier way."

He created a prototype for the TRAILER ENHANCEMENT KIT to make it easier to hook and unhook a trailer to and from a hitch ball. The design eliminates the need for manual manipulation of the trailer tongue. This does away with the physical stress and strain normally involved in this task, which also saves time and effort. Furthermore, the system is ideal for use by individuals with limited mobility.

The original design was submitted to the Orlando office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-ORD-2519, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
