

## **Visibility Enhancer for Drivers Developed by InventHelp Inventor (SAV-159)**

*InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, the OUTSIDE MIRRORS HELPER to applicable companies for their consideration.*

PITTSBURGH, PA ([PRWEB](#)) November 16, 2017 -- "When I was working at the airport, I drove a bus, and when it rained I had to wipe down my driver's side mirror with a t-shirt," said an inventor from Jacksonville, Fla. "I thought that there had to be a better way to keep my mirror free of moisture so that I could see clearly."

He developed the patent-pending OUTSIDE MIRRORS HELPER to offer a convenient way to keep side-view mirrors free of precipitation, dirt and debris. The unit ensures that the driver has a clear view of what is going on around the vehicle. This makes it easier to change lanes, merge and maneuver the vehicle. The system eliminates the need to wipe the side-view mirrors down manually. It provides added peace of mind while driving in inclement weather. Additionally, the accessory is adaptable for use with any new or existing vehicle.

The original design was submitted to the Savannah office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-SAV-159, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
