

Portable Car/Truck Desk Developed by InventHelp Inventor (HUN-349)

InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, the MOBILE DESK to applicable companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) November 16, 2017 -- Traveling sales and service representatives, contractors, truck drivers and delivery men spend a large portion of their day in their vehicle. Because their jobs rely so heavily on travel, such professionals tend to do a great deal of living out of their vehicle as well, including eating meals and working.

An inventor from Houston, Texas, has invented MOBILE DESK, a portable support for holding a computer, paperwork or food within a parked vehicle. "I had multiple food and laptop accidents while trying to eat or work in my vehicle," said the inventor. "I came up with this idea as a way to prevent any such accidents in the future." MOBILE DESK serves as a convenient alternative to setting items upon the dashboard, in one's lap, or the passenger seat. It supports electronic devices and other items in a hands-free manner to prevent arm strain and fatigue.

This invention would appeal to drivers everywhere, especially those who travel for work. It also keeps food and a drink elevated and easily accessible, and is sturdy yet lightweight and easy to transport.

The original design was submitted to the Houston office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-HUN-349, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
