

Linen Cart Hitch Attachment Developed (HLW-1893)

InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, the Easy Pro Tow, to applicable companies for their consideration.

PITTSBURGH ([PRWEB](#)) November 16, 2017 -- PITTSBURGH...Inventors from Leisure City, Fla., have developed the EASY PRO TOW, a hitch that is employed with golf carts and related utility vehicles that are used to tow linen bins.

"We were inspired by our job to develop our invention. We were required to transport linen bins weighing between 300 and 800 pounds. Our invention simplifies this task," said the inventors.

The EASY PRO TOW simplifies the transportation of linen bins. It allows such items to be transported in a stable position. This eliminates the need to manually push such carts about a facility. In addition, it reduces the amount of time and effort required for this purpose. This hitch may prevent overexertion and related injuries. It is adaptable for use on a variety of linen and related carts. This hitch is ideal for use on the grounds of hotels and motels, sports and recreation facilities, and medical facilities.

The original design was submitted to the Hollywood/Miami office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers.
