

## **Inventor Develops Antifreeze Accessory (LGI-2518)**

*InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, No FREEZ Heat, to applicable companies for their consideration.*

PITTSBURGH ([PRWEB](#)) November 21, 2017 -- PITTSBURGH...“I thought there needed to be a simple way to maintain antifreeze levels to help prevent freezing,” said an inventor, from Pt Jefferson Station, N.Y., “so I invented the NO FREEZ HEAT.”

The patent-pending NO FREEZ HEAT provides an effective way to maintain the antifreeze solution level within a hydronic heating system. In doing so, it eliminates the need to manually maintain levels. As a result, it provides added protection and it could help to prevent freeze damage. The invention features an adaptable design that is convenient and easy to use so it is ideal for households and businesses with hydronic heating systems. Additionally, the NO FREEZ HEAT is producible in design variations.

The inventor described the invention design. “My design ensures that proper antifreeze levels are maintained.”

The original design was submitted to the Long Island office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-LGI-2518, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
