

InventHelp Inventor Develops Tool for Accessing Items in a Pickup Truck Bed

InventHelp, a leading inventor service company, is working to submit Fetch and Go Get to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) November 23, 2017 -- "I did not want to have to crawl up into the truck bed in order to get the supplies stored behind the cab," said an inventor from Wampum, Pa. "To save me the trouble, I came up with this convenient tool to make it easier to retrieve items from the truck bed."

He created a prototype for the FETCH AND GO GET to provide a quick and easy way to retrieve items stored in the truck bed. The tool eliminates the need to climb up into the bed in order to access its contents. This saves time and effort, as well as prevents physical stress and strain. The device is also usable to maneuver items within the truck bed. Furthermore, the invention is ideal for use by individuals with limited mobility.

The original design was submitted to the Pittsburgh office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers.
