

## **Inventor Develops Cooling Accessory for Motorists (PHO-2443)**

*Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, Be Comfortable, in the hopes of a good faith review.*

PITTSBURGH ([PRWEB](#)) November 24, 2017 -- "I wanted to keep cool while driving on hot, sunny days," said an inventor from Glendale, Ariz. "Not wanting to spend my day sweating in the car, I came up with this idea in order to ensure that I remain comfortable and cool."

He created a prototype for the BE COMFORTABLE to keep the individual cool and comfortable. The accessory prevents the individual from overheating on a long drive. This enhances comfort when driving on hot, sunny days and also minimizes sweating. The device can be positioned on the driver's seat or passenger seats. In addition, it is suitable for use with an office chair.

The original design was submitted to the Phoenix office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-PHO-2443, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
