

## **InventHelp Inventor Develops Improved Children's Car Seat**

*InventHelp, a leading inventor service company, is working to submit Learn & Ride to companies for their review.*

PITTSBURGH ([PRWEB](#)) November 29, 2017 -- "I thought that it would be great if children's car seats were more versatile in their design," said an inventor from Columbus, Ohio. "I put my mind to it and designed a car seat that actually teaches children something, thereby ensuring that they are ready for school."

She created a prototype for the patent-pending LEARN & RIDE to recline so that the child can sleep comfortably. This ensures that the child remains happy and content on long trips. It also converts to a stroller to make life easier for parents and caregivers. The unit provides for ample learning opportunities. It adjusts to meet the educational and developmental needs of the individual child. Furthermore, all of this helps keep the child ready for school. In addition, the invention is designed to be interactive, entertaining and educational. It also serves as a highchair.

The original design was submitted to the Columbus office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-CLM-292, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
