

InventHelp Inventor Develops System for Greasing a Fifth Wheel

InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, the Fifth Wheel Greaser, to applicable companies for their consideration.

PITTSBURGH ([PRWEB](#)) November 29, 2017 -- "As a driver, I always found it a hassle having to grease the fifth wheel," said an inventor from Sylvester, Ga. "I wanted a more convenient and efficient way to get this job done, which led me to develop this improved system."

He developed the FIFTH WHEEL GREASER to offer a more convenient and efficient way to grease fifth wheel of a semi-truck. The design eliminates the need for the driver to get out of the cab. It dispenses grease precisely where it is needed. The system keeps the driver from getting soiled and dirty. It also saves the driver from having to haul around a separate grease gun and compressor. Furthermore, the system is designed to conserve grease.

The original design was submitted to the Houston office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-HTM-4168, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
