

Inventor Develops Accessory to Secure Cargo during Transit (STK-308)

InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, the EZ Hook, to applicable companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) November 30, 2017 -- PITTSBURGH...“I thought there needed to be a faster and easier way to load and secure cargo in a truck,” said an inventor, from Germantown, Ohio, “so I invented the EZ HOOK.”

The EZ HOOK provides an effective way to secure cargo within a truck or trailer. In doing so, it offers an improved alternative to traditional straps and cords. As a result, it saves time and effort and it could help to prevent loose or lost items. The invention features a user-friendly design that is convenient and easy to use so it is ideal for the owners of trucks and trailers. Additionally, the EZ HOOK is producible in design variations.

The inventor described the invention design. “My design eliminates hassles and delays when securing cargo.”

The original design was submitted to the National Sales Office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-STK-308, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
