

Inventor Develops Aid for Motorists with Young Children (SDB-1097)

Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, Easy Access to Kids in Third Row, in the hopes of a good faith review.

PITTSBURGH ([PRWEB](#)) December 02, 2017 -- "I needed a more convenient way to pass things from where I was seated in the front seat of the vehicle to my children in the third-row seats in the rear," said an inventor from San Diego, Calif. "I came up with this idea as the perfect solution to my problem."

She developed the EASY ACCESS TO KIDS IN THIRD ROW to offer a quick, easy way to pass things from the front seat to the third-row seat in the back. The accessory enables parents to help their children by passing them snacks, toys and other items. This keeps children occupied and entertained on road trips. The invention lessens the stress of traveling with young children. It also helps the driver focus fully on the road ahead. Furthermore, the unit features a compact design for ease of storage.

The original design was submitted to the San Diego office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-SDB-1097, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
