

## **Improved Windshield Winterizer Invented (DHM-384)**

*Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, External Windshield Protector, in the hopes of a good faith review.*

PITTSBURGH ([PRWEB](#)) December 07, 2017 -- Tired of having to remove snow and ice from my car's windshield every morning during the winter months and observing that other people placed cardboard over their windshields overnight to avoid the difficult task of doing this, an inventor from Wilson, N.C., decided to develop a solution to this strenuous problem.

The EXTERNAL WINDSHIELD PROTECTOR keeps snow and ice from piling up on a vehicle windshield. It eliminates the need to sweep or scrape off accumulated snow and ice, which saves time and effort. Overall, it promotes convenience and efficiency.

Ergonomic, easy to use and producible in different sizes, colors and designs, the EXTERNAL WINDSHIELD PROTECTOR is ideal for anyone living in snow-prone areas.

A prototype model is available upon request.

The original design was submitted to the Durham office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-DHM-384, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
