

## **InventHelp Inventors Develop System to Prevent Trailer Intrusion (BRK-1247)**

*InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, the TRAILER SECURITY SYSTEM to applicable companies for their consideration.*

PITTSBURGH, PA ([PRWEB](#)) December 07, 2017 -- "During his career as a police officer, one of two inventors from Selma, Ala., has seen many cases of unlawful breaking and entering of vehicles. The trucking industry suffers losses due to this crime almost daily. Since truckers are lawfully required to take extended breaks after driving a certain number of hours, many of them sleep in their trucks. Sometimes thieves manage to unload property from the trailer before the driver realizes it. "Our design solves this problem," the inventor said.

The TRAILER SECURITY SYSTEM increases semi-trailer security in order to help prevent theft and loss of revenue. As a result, it enhances safety of both property and truck drivers.

Reliable, easy to use and compatible with all semi-trailers, this system is designed to promote peace of mind.

The original design was submitted to the Birmingham office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-BRK-1247, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
