

InventHelp Inventors Develop Device to Notify Drivers If Child/Pet Was Left Behind in Vehicle

Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, Auto Safety Alert Device, in the hopes of a good faith review.

PITTSBURGH ([PRWEB](#)) December 08, 2017 -- “We thought there needed to be a better way to notify drivers if children or pets are left behind in a car,” said one of two inventors, from San Antonio, Texas, “so we invented the AUTO SAFETY ALERT DEVICE.”

The AUTO SAFETY ALERT DEVICE helps to prevent children or pets from being left unattended in a vehicle. In doing so, it offers added protection. As a result, it enhances safety and it provides an added peace of mind. The invention features an effective design that is convenient and easy to use so it is ideal for parents and vehicle owners. Additionally, the AUTO SAFETY ALERT DEVICE is producible in design variations.

The inventors described the invention design. “Our design could help to prevent heat or cold-related injuries or deaths.”

The original design was submitted to the Austin office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-AUP-838, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
