

Inventor Develops Portable Urinal for Truckers (HTM-5969)

InventHelp, a leading invention company, would like to submit EZP to companies for a good-faith review.

PITTSBURGH, Pa. ([PRWEB](#)) December 08, 2017 -- An inventor from Dickinson, N.D., has invented the EZP, a portable or stationary unisex urinal for use by truck drivers and others.

"My job as a truck driver inspired me to develop my invention. There are no equipped bathrooms or urinals in semi trucks. My invention will save time and provide comfort to truckers needing to urinate while on the road," said the inventor. The EZP provides professional drivers with a convenient and sanitary means of urinating within the vehicle interior. It allows a driver to feel more comfortable. This urinal will eliminate polluting the environment with urine-filled plastic bottles. In addition, it allows the driver to have a urinal in the truck without exiting the truck to empty any containers.

The original design was submitted to the National Sales office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-HTM-5969, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
