

Inventor Develops Automotive Accessory for Coat Hangers (SFO-433)

InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, Automobile Coat Hanger Extender, to applicable companies for their consideration.

PITTSBURGH ([PRWEB](#)) December 09, 2017 -- “I thought there needed to be a simple way to hang more coat hangers in my car when traveling,” said an inventor, from San Pablo, Calif., “so I invented the AUTOMOBILE COAT HANGER EXTENDER.”

The patent-pending AUTOMOBILE COAT HANGER EXTENDER provides an effective way to hang additional coat hangers within a vehicle. In doing so, it eliminates the need to lay clothes across the back seat or in the trunk. As a result, it enhances organization and it offers added convenience. The invention features a practical design that is easy to apply and use so it is ideal for vehicle owners. Additionally, the AUTOMOBILE COAT HANGER EXTENDER is producible in design variations.

The inventor described the invention design. “My design offers a more organized alternative to placing clothes in the backseat or truck.”

The original design was submitted to the San Francisco office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-SFO-433, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
