

InventHelp Inventor Develops Tool to Ease Task of Installing and Removing Lug Nuts from Cars

InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, the Star Gun, to applicable companies for their consideration.

PITTSBURGH ([PRWEB](#)) December 12, 2017 -- “I’m a mechanic and I thought there could be an improved way to install and remove lug nuts from a car,” said an inventor, from Marietta, Ga., “so I invented the STAR GUN.”

The STAR GUN provides a more effective way to install or remove lug nuts from a wheel. In doing so, it ensures that lug nuts are applied at the same rate and torque level. As a result, it increases efficiency and it saves time and effort. The invention features a practical design that is convenient and easy to use so it is ideal for mechanics and do-it-yourselfers.

The inventor described the invention design. “My design increases efficiency and it offers added convenience for mechanics.”

The original design was submitted to the Atlanta office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-ALL-1216, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
