

## **Invention Allows for More Convenient and Safer Airflow through a Vehicle (POO-311)**

*InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, Flow Window, to applicable companies for their consideration.*

PITTSBURGH ([PRWEB](#)) December 13, 2017 -- Two inventors from Seaside, Ore., know the importance of fresh air while driving and the need for safety for pets that are kept in unattended vehicles. "We like to travel with our dogs, but we can't always take them into places with us," said one inventor. "However, we worry about outsiders abusing the dogs when we leave them in the car with the windows open for fresh air and safety." In order to solve this problem, they came up with the idea for the patent-pending FLOW WINDOW. "Dogs are our best friends, and it's our responsibility to protect them," the inventor added.

This invention allows for more convenient circulation of fresh air in a vehicle interior and prevents insects from getting in. It also provides a safer way to leave pets in the vehicle while parked by making sure they don't die from extreme heat and by keeping outsiders from abusing them.

Designed to promote comfort and peace of mind, the invention is ergonomic, easy to use and producible in many design variations.

The original design was submitted to the Portland office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-POO-311, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
