

Inventor Develops Improved Traffic Light (CHA-118)

Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, Countdown Stop Light, in the hopes of a good faith review.

PITTSBURGH, PA ([PRWEB](#)) December 14, 2017 -- PITTSBURGH..."So many collisions happen at intersections because the drivers are not on the same page," said an inventor from Woodridge, Ill. "I thought that the design of the conventional traffic light could be improved upon so that everyone at the intersection has better information."

He developed the patent-pending COUNTDOWN STOP LIGHT to provide more information than traditional traffic lights. The design ensures that all motorists at the intersection are aware of when the lights will change. This reduces confusion at busy intersections, which helps to enhance roadway safety. Additionally, the traffic light offers added peace of mind, is easy to understand and aids color-blind individuals to understand red-yellow-green traffic lights.

The original design was submitted to the Chicago office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-CHA-118, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
