

Inventor Develops Novelty Hitch-Receiver Decoration (HUN-394)

InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, the Tail Light, to applicable companies for their consideration.

PITTSBURGH ([PRWEB](#)) November 29, 2017 -- PITTSBURGH..."I saw people driving around with novelty bull testicles dangling from their hitch receivers," said an inventor from Friendswood, Texas. "I was surprised by how many had been purchased. They appeared everywhere. Later I came up with what I believe to be a much funnier and better product. Not only does it add a funny touch to the vehicle, it also alerts others of braking. The product would be a perfect gift for any proud truck or SUV owner!"

He developed the patent-pending TAIL LIGHT to add a humorous touch to the rear of the vehicle. The device alerts other motorists that the equipped vehicle is braking. The unit attracts the attention of onlookers and serves as a conversation piece. The invention may help to make stressful rush-hour commutes less stressful and aggravating. Additionally, it is adaptable for use with virtually any hitch receiver.

The original design was submitted to the Houston office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-HUN-394, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
