

Ski Equipment Travel/Storage Unit Invented (SDB-805)

Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, Ski Bullet, in the hopes of a good faith review.

PITTSBURGH ([PRWEB](#)) November 29, 2017 -- An inventor from San Diego, Calif., has developed the SKI BULLET, a new type of carrier for ski equipment. "I am a skier and needed an organization unit that would keep my equipment clean and dry while traveling. In addition, I wanted a way to store my equipment in the garage when not being used," said the inventor.

Snow sports enthusiasts will appreciate the SKI BULLET. It will provide them with an enclosed transport system. It safely secures to a vehicle's roof rack and ensures ski equipment remains organized and protected during transport. Also, it allows for easy upright storage for garages and household closets. In addition, it's producible in three different units can be used to hold four, six or eight skis and poles. This highly organized carrier will eliminate the need to carry the equipment separate, thus making the ski trip more enjoyable.

The original design was submitted to the San Diego office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers.
