

Handicap Placard Display Holder Invented (HLW-1819)

Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, Card Caddy, in the hopes of a good faith review.

PITTSBURGH ([PRWEB](#)) December 06, 2017 -- An inventor from Port Saint Lucie, Fla., has developed the CARD CADDY, a vehicle accessory used for holding and displaying a handicapped parking placard. A prototype is available.

"I received a handicap placard and was inspired to develop a convenient way to store and display it," said the inventor.

The CARD CADDY provides a quick and easy way to display and store a handicapped parking placard. It simplifies placard usage, especially for disabled drivers. This will minimize the amount of arm movement required to display the card. In turn, this accessory will spare the motorist unwanted pain, stress and fatigue. In addition, it will prevent the card from being misplaced. This handy holder may even prompt a motorist to use the card more regularly.

The original design was submitted to the Hollywood office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-HLW-1819, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
