

Invention Helps Make Vehicle Air Bags Safer for Drivers and Passengers (FED-1814)

InventHelp, a leading inventor service company, is working to submit the Engler Device to companies for their review.

PITTSBURGH ([PRWEB](#)) December 07, 2017 -- An inventor from Auburn, Wash., wanted to do something to help decrease the number of injuries and deaths caused by defective air-bag deployment, so he came up with the idea for the AIR BAG SEFETY DEVICE.

This device provides protection against neck injuries and metal shards that may accompany the air bag when it deploys in an accident. It is designed to help prevent fatalities and injuries. This promotes safety and peace of mind.

Durable, comfortable, easy to use and producible in many design variations, the device is ideal for all driver and front-seat passengers of vehicles.

The original design was submitted to the Seattle office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-FED-1814, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
