

## **Invention That Ensures More Sanitary Garbage Trucks Developed by InventHelp Inventor (KOC-388)**

*Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, in THE ELIMINATOR in hopes of a good faith review.*

PITTSBURGH ([PRWEB](#)) December 08, 2017 -- "While riding my bike one day, a garbage truck passed," said an inventor from Columbus, Miss, "Taking my breath away by the odor and contaminants of the truck, I knew then that something must be done. This inspired me to get involved and create a reliable, affordable way to solve this widespread problem affecting all of us around the world."

THE ELIMINATOR provides an easy, affordable and effective way to disinfect the interior and contents of a garbage truck. It reduces the spread of germs and bacteria contaminants, and fights air pollution. As a result, it promotes a cleaner environment and peace of mind.

Reliable, affordable and easy to use, this system is ideal for all waste-management services, sanitation departments and municipalities.

The inventor has created a prototype of his idea.

The original design was submitted to the Canada office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-KOC-388, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
