

## **InventHelp Inventor Develops Fuel Saver (TPA-2581)**

*InventHelp, a leading inventor service company, is working to submit the FUEL SAVER to companies for their review.*

PITTSBURGH ([PRWEB](#)) December 15, 2017 -- “I thought there needed to be a better way to utilize the air conditioning system in a truck or car,” said an inventor, from Belleview, Fla., “So I invented the FUEL SAVER.”

The patent-pending FUEL SAVER provides a more efficient way to operate a vehicle’s air conditioning system. In doing so, it offers an alternative to engine powered compressors. As a result, it helps to reduce fuel consumption and it could help to reduce air pollution. The invention features an effective design that is convenient and easy to use so it is ideal for vehicle owners. It also increases engine power and the life of the air-conditioner. Additionally, the FUEL SAVER is producible in design variations.

The inventor described the invention design, “My design increases efficiency by reducing engine strain.”

The original design was submitted to the Tampa office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-TPA-2581, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
