

Inventor Develops Accessory for Trailers (OLC-308)

Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, Beck Hydraulic Overair Valve, in the hopes of a good faith review.

PITTSBURGH ([PRWEB](#)) December 17, 2017 -- PITTSBURGH...“I thought there needed to be a safer way to pull a trailer with air brakes behind a truck with pneumatic brakes,” said an inventor, from Mountain View, Okla., “so I invented the BECK HYDRAULIC OVERAIR VALVE.”

The BECK HYDRAULIC OVERAIR VALVE provides an improved way to operate and control a trailer's air brakes. In doing so, it could help to prevent jackknifing accidents. As a result, it enhances safety and peace of mind. The invention features an effective design that is convenient and easy to use so it is ideal for truck owners. Additionally, the BECK HYDRAULIC OVERAIR VALVE is producible in design variations and a prototype is available.

The inventor described the invention design. “My design helps to prevent unexpected jackknifing with sudden braking.”

The original design was submitted to the Oklahoma City office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-OLC-308, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
