

Inventor Develops Anti-Theft Device for Valve-Stem Caps (SDB-1147)

InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, Cool Caps, to applicable companies for their consideration.

PITTSBURGH (<u>PRWEB</u>) December 17, 2017 -- PITTSBURGH..."I thought there needed to be a simple way to prevent the theft of valve stem caps and the tampering of tire pressure," said an inventor, from Wildomar, Calif., "so I invented the COOL CAPS."

The COOL CAPS provides an effective way to protect a vehicle's valve stem caps. In doing so, it offers an improved alternative to traditional valve stem caps. As a result, it could help to prevent unwanted tampering and removal and it enhances security and peace of mind. The invention features a lightweight design that is convenient and easy to use so it is ideal for vehicle owners, motorcyclists, cyclists, semi drivers and owners of vehicles with valve stems. Additionally, the COOL CAPS is producible in design variations.

The inventor described the invention design. "My design ensures that a vehicle's valve stem caps are protected."

The original design was submitted to the San Diego office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers.
