CTGroup Software signed a contract with Novosibirsk car dealership Stoliza-C for the automation of a gateway operation. The automatic system will provide enhanced record-keeping and control over passing vehicles and payments. It will also possess an imbedded functionality of automatic turnpike and surveillance camera management.

Novosibirsk, Russia ([PRWEB](http://www.prweb.com)) May 13, 2004 -- CTGroup Software signed a contract with Novosibirsk car dealership Stoliza-C for the automation of a gateway operation. CTGroup offers end-to-end solution that includes customized software development, supply and installation of needed equipment.

The automatic system will provide enhanced record-keeping and control over passing vehicles and payments. It will also possess an imbedded functionality of automatic turnpike and surveillance camera management.

Newly developed system will speed up the registration and payment process at a gateway; strengthen the control over passing vehicles; eliminate unregistered departure of a vehicle from the territory of the car dealership; and facilitate rates and discounts setting. Fault-tolerant system will mirror all operations ensuring system's operational capacity even under unexpected hardware or software failures.

First software version is expected to be put into commercial operation in June 2004.
