

New Warning System Will Prevent Accidents & Save Lives

This valuable new device alerts drivers of emergency vehicles that may be in the vicinity.

Prescott, Arizona ([PRWEB](#)) June 8, 2004 -- resident Larry Medina was at a traffic light. As the light turned green, he proceeded to move through the intersection. Since his music was on, he did not hear the ambulance that was coming through, and it almost hit him. It was because of this that Mr. Medina, along with B.Chance, created the Emergency Vehicle Warning (EVW).

This valuable new device alerts drivers visually of emergency vehicles that may be in the vicinity. The EVW system allows people to get out of the way or stop. It can prevent injuries and save lives, since often times drivers are unaware of those vehicles. Finally, the EVW system is easy to install, and particularly valuable to all drivers, as automobiles are more sound proof to outside noise.

This original idea is now being made available for licensing to manufacturers interested in new product development. Mr. Medina and Ms. Chance are hoping to have the EVW in full production and available to the public within the very near future.

Additional information about the Emergency Vehicle Warning can be obtained by contacting the Publicity/Press Dept. of Invention Technologies, Inc. at (800)940-9020 ext 285 or at products@invent-tect.com Invention Technologies, Inc. is a Coral Gables, Florida based company that is handling the publicity and public relations for the Emergency Vehicle Warning.

Note: This information is offered as a human-interest story about the inventor and conception of the idea. Neither this release nor any publication of it constitutes disclosure of functional or structural details of the invention.
