

Our Children Are Our Most Precious Treasure, New Product Helps Them in an Emergency:

The Rescue Facts Information Pack is an ingenious, wrap-around nylon folder that holds pertinent medical information for use in the event of an accident.

([PRWEB](#)) June 25, 2004 -- There is nothing more important to us than the safety of our children, and now there's a way to insure their safety during the times we cannot be with them. The Rescue Facts Information Pack is an ingenious, wrap-around nylon folder that holds pertinent medical information for use in the event of an accident. A child size version attaches to car seat strap, backpack strap, belt, diaper bag, bicycle handlebar or helmet strap and is available in a variety of colors to suit the discerning taste of your youngster.

Far more informative than a Med-Alert bracelet, Rescue Facts contains all the necessary information about your child and his/her blood type, medications, allergies, medical conditions, primary physician, emergency contact, a photograph and much more. If your child has an allergic reaction to bee bites, have a medication regime, or should ever become lost or injured, Rescue Facts can help bring her or him safely home.

Rescue Facts is in traditional bright red. Whatever color you choose, the medical alert logo captures the attention of emergency personnel at the scene and the information it contains gives them the ability to provide prompt, efficient treatment.

Rescue Facts is affordable enough to have one for every member of the family. Contact Rescue Facts online at www.RescueFacts.com or by phone at 541-665-2373, or write to Rescue Facts, PO Box 3157, Central Point, OR 97502.
