

Magicians/ Mentalists Become The First To Drive Across America Blindfolded!

In May 2004 Magicians/Mentalists Marco Frezza and Eric Anderson became the first to drive across America blindfolded. Against Impossible odds Marco and Eric drove blindfolded through more than 17 states, and over 6100 miles.

([PRWEB](#)) July 9, 2004 -- In addition, a standing reward of \$500,000 was offered to anyone who could find their car gimmicked in any way possible that would allow them to drive across America while completely blindfolded!

Although many people, including car mechanics, inspected their car meticulously during The First Blindfold Drive Across America, no one was able to produce any evidence of their car being rigged in a way that would aid them in navigating the vehicle while completely blindfolded!

* The Blindfold Process began with silver dollars embedded into their eyes, which were then secured with industrial strength duct tape, followed by fifteen feet of medical wrap, and then topped off with blindfolds.

All materials were examined prior to the blindfold process, and were then applied by various members of the media and State Police Departments.

Their goal was to raise awareness for National Foster Care Month by performing this incredible illusion. The First Blindfold Drive Across America was seen by millions through more than 17 states and was featured on CNN, NBC, CBS, and FOX.

" Eric and I would just like to thank the millions who came out to support us during The First Blindfold Drive Across America. We sincerely hope to have inspired children in foster care and others to reach for their dreams and do the impossible " says Marco Frezza, Co-Creator of The Blindfold Drive Across America.
