

## **OpenRule Systems, Inc. signs new client for its Application Process Management Solution (APM)**

*OpenRule Systems, Inc. signs new client for its Application Process Management Solution (APM)*

Dallas, TX ([PRWEB](#)) August 5, 2004 -- Open Rule Systems, (ORS) announced this past week the signing of a new client for its Application Process Manager (APM) solution, Tidewater Motor Credit of Virginia Beach VA. APM is a state of the art software solution designed to facilitate application processing for a wide variety of lending products. APM can be utilized to manage almost any lending underwriting decisioning process including automotive, unsecured line of credit, credit cards and many others. "It's obvious that this one system can support and improve all of our lending models." According to Travis Harrell, Business Analyst, Tidewater Finance Company.

### **About Open Rule Systems**

Based in the Dallas/Fort Worth Metro area, Open Rule Systems APM solution is the most flexible and comprehensive application processing solution on the market today. According to Bill Hemstreet, VP Sales APM has been designed to reduce the reliance of lending professionals on technology resources like programmers and software vendors. The unique easy-to-use design allows business professionals to define, enforce and maintain the rules that govern every aspect of their application lifecycle and decisioning workflow using a comprehensive set of modules that makes APM the most flexible and comprehensive application processing solution on the market today. The ability to create, implement and modify proprietary business rules to support the entire application processing lifecycle, without interruption of the production system and without traditional programming is unprecedented.
