

" OEM GROUP's SECURESEAL REUSABLE SECURITY SEALS LAND AT SANDFORD AIRPORT ORLANDO FL"

The UK's market leading reusable security seal the "Secureseal"(TM) being used for the first time on airline catering trucks in the USA, The mechanical Secureseal replaces disposable seals and uses "random number technology to produce a unique 5 digit code which cannot be predicted and enables "tamper evident" load protection.

([PRWEB](#)) September 18, 2004 -- UK Company the OEM Group have supplied their market leading Security seal for airline catering trucks based at Sandford Airport Florida, The Secureseal is already established in the UK and Europe as the most cost effective way to replace traditional plastic or metal security seals for transportation.

Leading retail fleets and airline catering trucks have reduced their sealing costs and have at the same time improved the load security by fitting the unique patented "Secureseal"

Manufactured in high quality stainless steel Secureseal's innovative "random number generator" is guaranteed for at least 50,000 operations and uses NO BATTERIES!

Originally launched in 1997 ,Secureseal has been specified by transportation fleets throughout the world and in 2000 was awarded a prestigious Dept of trade & Industry (UK) award for Innovation.
