

Maddocks Systems Inc. Delivers Record Growth During 2004

Maddocks Systems Inc., a leading supplier of transportation and logistics software, and the developers of the TruckMate for Windows (TM4Win) enterprise package experienced a record level of growth during 2004. The company was able to successfully meet the growing demand from carriers across the U.S. and Canada to deliver software solutions for fleets in every segment of the trucking industry.

([PRWEB](#)) January 10, 2005 -- "Our corporate focus during 2004 was to form what we considered to be partnerships in technology with leading transportation carriers in each specific section of the trucking industry," said Bob Maddocks President and CEO of Maddocks Systems Inc. "This involved being selective in the new business we pursued and focusing strategically on new clients that were seeking a software solution partner to help ensure long-term company growth."

Maddocks Systems Inc. welcomed new clients from every segment of the transportation industry during 2004. A few examples of the diverse group of companies to select Maddocks in 2005 included: Quickway Services Inc. a dedicated carrier based in Nashville, Tennessee; MCO Transport a intermodal specialist based in Wilmington, North Carolina; Crosscountry Courier a high volume LTL carrier based in Bismarck, North Dakota and Tab Warehouse & Distribution Co. a leading transportation and consolidation provider based in Stockton California.

"We expect to see the demand for software solutions in the trucking industry to continue to expand during 2005," added Maddocks. "We are already on pace to be fully booked with new sales for the first quarter by the end of January. This is a great indication that the trucking industry is poised for another year of considerable growth."

Founded in 1981, Maddocks Systems Inc. (www.maddockssystems.com) is a leading supplier of software solutions exclusively to the transportation and logistics industry. Truckmate for Windows is an enterprise-wide client server product designed to meet the needs of Truckload, LTL, Brokerage/Logistics, Bulk, Intermodal and Private carriers. With over 450 installed systems, Maddocks is the number one provider of Windows client-server trucking software solutions.
