

## **Exotic Automobile Warranty Company signs contract for the Athena System.**

*The Exotic Automobile Warranty company processes warranty policies for exotic automobiles such as Lamborghini's, Ferraris, and Porsches. The company has quickly outgrown their simple policy management and claims processing system and is looking for a better way to keep track of the policies and claims.*

([PRWEB](#)) September 26, 2004 -- "The Exotic Automobile Warranty company processes warranty policies for exotic automobiles such as Lamborghini's, Ferraris, and Porsches. The company has quickly outgrown their simple policy management and claims processing system and is looking for a better way to keep track of the policies and claims.

Ben E. - Exotic Warranty president - took a look at the Athena policy management system and he immediately saw the benefits of owning a 100% web based system. With the Athena system the company will be able to streamline their policy issuance, commission, and claims tracking as well as move into a paperless environment where all users with proper rights will be able to view every digitized document associated with a policy or claim. Ben plans on taking the company 100% paperless with the Athena Attachment service module that already is designed to work with the high speed HP digital Sender.

We look forward to helping Ben and his team!"

Said - Sean Pitcher - President of Maximum Processing Inc.

Maximum Processing is a privately held corporation that specializes in developing insurance policy processing solutions specifically tailored to a company's business requirements. By thoroughly analyzing a company's business requirements they create a full set of documentation. This uniquely formed documentation is gathered in sessions specially designed by Maximum Processing to get to the heart of the business rules and document them in a such a way as - that both the client and the software developers thoroughly understand the system before it is ever built.
