

## **Introducing ClearPlus Sentinel Series - Leading Edge Performance and Value Wiper Blades**

*ClearPlus Windshield Products is excited to launch Sentinel Series all-season wiper blades at the 2004 AAPEX show in Las Vegas. Designed for discriminating buyers, Sentinel is a fine addition to the ClearPlus line of high- performance wiper blades, which include Signature Series, Premium Series and winter blades.*

([PRWEB](#)) October 14, 2004 -- ClearPlus is a full-line windshield wiper blade company. We offer all season blades, winter blades and refills. A relentless pursuit of quality and dedication to customer satisfaction has spurred the growth of our products for the last seven years. A wholly owned, fully integrated production facility differentiates us from importers and re-packagers who use third party manufacturing facilities. In a product category dominated by a few OEM manufacturers, ClearPlus has fast established a successful track record and a reputation for value.

We are excited to present our newest product, Sentinel Series all-season blades at this year's AAPEX show(Nov 04)in Las Vegas. Designed for discriminating buyers, Sentinel is a fine addition to the ClearPlus line of high- performance wiper blades, which include Signature Series, Premium Series and winter blades.

Robust, all-metal, aerodynamically designed frame and wide spaced wind channels provide perfect wrap around highly curved windshields and prevent wind lift at high speeds.

Universal pre-installed adapter works with all hook arms, all pin arms and bayonet arm that together make up roughly 98% of the cars on North American roads. Additional adapters allow installation with beam blade arms used on late model European cars.

Adapter mounting pin and saddle are designed to strengthen overall structure and reduce corrosion.

Split, high-grade stainless steel flexors allow even pressure distribution between all pressure points.

Embedded stainless steel rivets at metal-to-metal joints enhance frame durability, safety, flexibility and appearance.

Specially formulated, Natural rubber compound is molybdenum impregnated to provide smooth, streak-free and noise-free wipe in all weather conditions. It exceeds all established benchmarks for physical properties followed by major international brands.

Attractive, tri-lingual (English/Spanish/French), re-closable blister packaging allows program roll out anywhere in North America.

Available in sizes 11, 13, 15 - 22, 24, 26 and 28 for full line coverage, with direct import option and/or fulfillment from distribution centers in US and Canada.

Be sure to visit us at AAPEX 2004 for more information on all our products. We look forward to meeting you!
