

## **Havis Partners with Dell and Mueller Co. to Increase Productivity in the Rugged Warehouse**

*New case study, IP65-rated docking solution now available*

WARMINSTER, Pa. ([PRWEB](#)) March 14, 2017 -- Havis Inc., a leading manufacturer of mobile office solutions, has released a new case study of its partnership with Dell and Mueller Co. to increase productivity and shipping speeds in a rugged warehouse environment. Results from the case study helped to develop Havis' new IP65-rated fixed docking solution for Dell Latitude 12 Rugged Tablets.

Mueller Co., North America's largest supplier of potable water distribution products, partnered with Dell and Havis to identify a rugged tablet, docking and forklift mount solution that would enable employees at its Chattanooga, Tenn. plant and warehouse to stay connected to devices in rugged conditions. Havis' case study reviews how Mueller tested the solution's ability to withstand and operate through extreme heat, moisture and vibration, resulting in a more productive warehouse.

Havis used feedback from Mueller's tests and other customers to develop the DS-DELL-700 Series of IP65-rated fixed docking solutions with internal power supply options for Dell Latitude 12 Rugged Tablets. The Ingress Protection (IP) rating of "65" indicates a "dust tight" design that protects enclosures against jets of water from any direction. The wire sealing elements included for the IP65 compliance have a patent pending. Internal power supply options are available within the series for 12V vehicles to provide a low profile solution for mobile charging in the field or warehouse.

Havis works directly with OEM partners like Dell to develop computing device-specific docking stations that are ergonomically designed to maximize safety and comfort, and tested to the industry's highest safety standards to ensure quality performance in the most rugged conditions.
