

## **Johnston Sweeper Company Introduces an All-Wheel Suspension Option on its 3000 Mechanical Sweeper Model.**

*The all-wheel suspension option adds a new level of safety, comfort and additional maneuverability to the Johnston 3000 three-wheel, "hydrostatic drive" mechanical street sweeper.*

([PRWEB](#)) December 18, 2004 -- Johnston introduces an all-wheel suspension option on the extremely versatile 3000 mechanical sweeper. Safety, comfort and maneuverability reach a new level with this added feature. Operator fatigue is minimized, road handling is greatly enhanced and "shock impact" to the vehicle's electrical system is virtually eliminated. This option, in conjunction with Johnston's new luxurious cab, ensures the ultimate in comfort and safety for the most important part of your sweeping business "your operator."

Features of the Johnston 3000:

- 5.6 cubic yard hopper
- Front and center mounted cab gives operator full panoramic field of vision
- Center mounted hopper for stability and even weight distribution
- Safety drive lock-out when hopper is in raised position
- Sweeper is completely powder painted before assembly
- Stainless steel hopper floor and front
- Hydraulic valves and solenoids located in a protected compartment
- Electrical components housed in weatherproof locker

Johnston background: Johnston Madvac Inc has a worldwide customer network of 200 stocking distributors in over 70 countries. Johnston designs and manufactures vacuum, mechanical and re-generative air, street and runway sweepers. Founded in 1904, the company is the recognized and respected leader in its field. Johnston produces and provides the highest quality sweepers for airports, highways, major cities, towns & municipalities, federal & state properties, industrial & commercial complexes, landfill sites, parks, schools & universities, shopping centers & parking lots, streets and contractor applications.
