

Traveling in the Snow?

New Seat Belt Attachment Helps Save Lives when Traveling by Car

([PRWEB](#)) January 25, 2005 -- Traveling in the snow can cause havoc. Some havoc comes in the form of auto accidents. One of the scariest moments in a person's life can very well be the moments before impact of a car accident. Those moments become scarier when you

have a child in the car with you. Rescue Facts LLC has put together a product that although it won't prevent an accident from happening, it may ease your mind when an accident occurs.

The Rescue Facts Information Pack is a nylon wrap that secures around your seatbelt and is secured by Velcro. An embroidered universal medical symbol alerts EMS and Police that there is important health information inside. Medical forms including consent to treat form are included with the Rescue Facts Information Pack and fold up to fit inside the pocket of this nylon wrap.

Developed by Brian Day a police officer and John Murly, a former EMT the Rescue Facts Information Pack who know first hand the frustration of piecing together a medical history of crash victims.

Rescue Facts Information Pack is affordable for everyone. Costing a low \$7.99 it is easy to purchase a Rescue Facts Information Pack for every member of the home. To order your Rescue Facts Information Pack please visit their web site at www.rescuefacts.com
