

Updated Auto Plus Kicks Off the New Year in Style! Auto Plus 2.05 Raises the Bar on Automotive Industry Software Systems!

The original version of Auto Plus allowed those in the automotive industry to enhance organization, productivity, efficiency, as well as more easily manage systems. Now with the added features the updated version goes steps further insofar as augmenting access information, inventory, electronic cataloging, purchase order changes, accounts receivable and payable, customer information, order entries, and much, much more. In short, the sophisticated software is as simple to use but even more efficient and more cost effective.

Los Angeles, CA ([PRWEB](#)) January 28, 2005 -- Just imagine if the original Auto Plus Software realized such astounding results, think of what the updated Auto Plus 2.05 Version can do for your business? Mr. Johnny Halverson, CEO/President of River's Edge, Inc., a leading provider of automotive software applications is pleased to announce that River's Edge has raised the bar on organization by introducing the upgraded Auto Plus 2.05 Version, a revolutionary, cutting edge software that is taking the auto industry by storm. The updated version of the software release is being considered the BEST automotive solution for the small, mid sized and larger automotive corporations. Why? Because it has proven to greatly enhance efficiency and organization for related auto manufacturers, wholesalers, distributors and retailers. In fact, software and automotive critics have endorsed Auto Plus 2.05, and are singing its praises. And users are reporting immeasurable organization and efficiency, increased sales, improved productivity and far-reaching systematic procedures.

Quoting Mr. Halverson, CEO of River's Edge: "We listened to what our clients had to say and because we wanted to help resolve all their business challenges as well as assuring the most cost-effective upgrade in the fastest, easiest way, we went back to the drawing board and augmented the user-friendly software, giving our clients even greater power to make positive changes while keeping their business running smoothly. Using the latest and most advanced technology, Auto Plus 2.05 does that and more. In our desire to provide the greatest business solutions that go above and beyond client expectations, Auto Plus 2.05 now makes it possible for anyone in the automotive community to have access to this phenomenal software.

According to Mr. John Hess, Editor of the Cool Profits Trade Magazine: "Having reviewed many computerized shop management systems during the past 10 or so years, most were adequate to good, but all suffered from a complex menu or navigation system. Not so with Auto Plus. I'm really excited about this software as it's simple to learn and use, packs the power to run a large multi-user warehouse distribution operation and has the ability to produce catalogs both written and on CD for distribution. And that's only the beginning. Once taking a look at the opening menu, it's easy to see how sweet this really gets. I highly recommend trying River's Edge Auto Plus Demo."

New Features:

Auto Plus 2.05 has added exciting new features that provide a host of highlights some of which address:

- Updated Price Sheet functionality
- Default gross profit margins for calculating purposes
- Selling prices automatically analyze and enter based on pre-defined gross profit margin
