

Preserving the Great Outdoors for Great Outdoorsmen - ÂRV DivisionÂ Launched By Largest Provider of Renewable Energy Products, the Alternative Energy Store

For customers who enjoy the great outdoors, energy independence and take pride in preserving precious resources, the Alternative Energy StoreÂs RV Division customer service staff will help folks determine the exact renewable energy products needed.

WORCESTER, MA ([PRWEB](#)) February 10, 2005 -- The Alternative Energy Store, the largest provider of renewable energy products, has recently launched a new RV Division. Catering to RV, motor home and trailer home customers around the globe via their online store ([AltEnergyStore.com/rv](#)) and catalog, the Alternative Energy Store is headquartered in Worcester, Mass.

For customers who enjoy the great outdoors, energy independence and take pride in preserving precious resources, the Alternative Energy StoreÂs RV Division customer service staff will help folks determine the exact renewable energy products needed.

From lightweight solar panels for charging laptops or cell phones to renewable energy systems for RVs, motor homes and trailer homes that provide customers with Âhook-upÂ independence, the Alternative Energy Store offers an extensive list of ÂgreenÂ products backed by a knowledgeable and helpful staff.

ÂWeÂre dedicated to making it easy to learn about and use renewable energy systems. Our RV Division staff consults with customers to determine their needs and suggest appropriate products for their specific environment. Whether our customer is an enthusiast or just beginning to take an interest in renewable energy, weÂll do all that we can to make their experience with us a positive one,Â noted Sascha Deri, president of Alternative Energy Store.

Innovative Alternatives

ÂFor those with a small cabin or camp, the Small Cabin 12VDC Solar Kit (\$1409) is an ideal source of renewable energy and will power small appliances such as television, radio and fluorescent lights for several hours each day. The kit includes solar panels, Trojan batteries, charge controller, breaker, lightning arrestor, battery cables and PB array disconnect.

ÂThe Shell Solar RV Power Kit enables folks with RVs to escape from crowded campgrounds and noisy generators by offering an independent power source fuelled by the sun. The easy-to-install package does it all, from trickle charging batteries to powering electronics and appliances. These kits range from 10W (\$149) to 100W (\$832).

ÂUni-Solar Solar Traveler Kits are triple junction silicon, unbreakable, shadow protected solar panels that can withstand the harsh environment of an RV roof or boat deck. Complete kits include regulator, mounting and wiring hardware and instructions. Kit price varies by power output and range from \$357 to \$615.

ÂDesigned specifically for RVs and boats, the Sun-Mar Ecolet Mobile Unit (\$852) is the first composting toilet specifically designed to recycle waste for fewer pump-outs. The odor-free recycling unit offers freedom

from harsh chemicals and is safer for you and the environment.
