

PWM Enterprises is Now Offering Free Imprinting on the Gear Grinding Pen

PWM Enterprises, Inc. is taking the automotive corporate gift market by storm by offering free imprinting with no minimum purchase requirements on their new product, the Gear Grinding Pen. These pens are made with brand new popular shifter parts. The pen tube is made from precision machined anodized aircraft aluminum. The PWM Enterprises development team has designed a miniature self-contained shifter linkage to let you run through the gears on your desktop.

([PRWEB](#)) February 16, 2005 -- For years the only choice a company had when purchasing automotive corporate gifts was to buy inexpensively made imported products, and then pay a mint in imprinting costs and large minimum order requirements. PWM Enterprise has turned that around.

They are now offering the Gear Grinding Pen with free imprinting. This new Gear Grinding Pen will be sure to enhance any corporate executive's desk. Imprinting is available on the gear shifter knob and they include a picture frame where you can incorporate your business cards or a personalized message.
