

Head Injury Patient Testifies to the Healing Power of Love

In 1997 Nancy Bauman of Salt Lake City, Utah (or other location) suffered a severe head injury as the result of a serious car accident. She lay unconscious for seven weeks. Bauman credits her miraculous recovery to the power of love and in particular, to the power of her husband's love. Her true life story moves people to tears as she describes the arduous journey from a near-vegetable state to where she is today - a vibrant mother of six with a fulfilling career as a human resource manager.

Salt Lake City, UT ([PRWEB](#)) February 16, 2005 -- Around Valentine's Day, the greeting card industry is hoping everyone will be smitten by the love bug. Of course, feelings of romantic love can move consumers to buy cards, flowers and chocolates for their beloved, but can they heal wounded bodies and souls?

In 1997 Nancy Bauman of Salt Lake City, Utah (or other location) suffered a severe head injury as the result of a serious car accident. She lay unconscious for seven weeks. Bauman credits her miraculous recovery to the power of love and in particular, to the power of her husband's love. Her true life story moves people to tears as she describes the arduous journey from a near-vegetable state to where she is today - a vibrant mother of six with a fulfilling career as a human resource manager.

At the urging of those who heard her story, Bauman decided to write about her own experience in order to inspire other victims of serious head trauma and their loved ones. She told her story to Exponent II in 1982 and received overwhelming response from readers that her story was indeed helpful to others. She decided to take her personal account one step further.

Bauman's new novel, *As Simple As It Gets*, will be released today by American Book Publishing. Bauman's compelling tale weaves the details and actual experiences of her own recovery into the lives of an endearing and memorable cast of fictionalized characters. The result is an inspirational love story that is sure to inspire other victims of head trauma to be open to giving and receiving love, a necessary component in all healing.

“Hopefully, people will realize the powerful effect that patience and love from a significant other can have on their loved one's recovery,” says Bauman, who has experienced the love and support of her own husband as she went through her own ordeal.

Bauman enjoys writing “happily-ever-after” romances that deal with disabilities, depression and overcoming other trials. She believes that many people will appreciate the honest and simple sentiments she weaves into the stories based on her own experiences.

For anyone who has suffered a head trauma or who knows someone who has, or anyone who wants more evidence of the healing power of love, *As Simple As It Gets*, by Nancy Bauman, is sure to satisfy.
