

EFI University Tuner's Certification Becomes International

Glenn Campbell of HyperDrive Motorsports, a prominent EFI Tuner located just outside of Perth, Western Australia successfully completed the EFI University High Performance Tuner's Written Exam with flying colors to become the first Australian to obtain credentials from EFI University in January of this year.

([PRWEB](#)) February 24, 2005 -- Glenn Campbell of HyperDrive Motorsports, a prominent EFI Tuner located just outside of Perth, Western Australia successfully completed the EFI University High Performance Tuner's Written Exam with flying colors to become the first Australian to obtain credentials from EFI University in January of this year.

The exam, which consists of eighty multiple-choice questions based on materials learned in the EFI-101, and EFI Advanced class, is administered completely online.

Once students complete both the EFI-101 and EFI Advanced courses, they must gain valuable field experience using Dynamometers and EFI Tuning equipment and document this experience in their EFI University Log Book before becoming eligible to take the online exam. Once determined eligible, students receive a private website link to apply and pay their registration fees for the exam, and then they are led through another link to the actual exam site. The exams are submitted to EFI University online, where they are automatically graded and the results are returned to the student immediately.

Founder of EFI University, Ben Strader, says: "Having a network of qualified EFI Tuners helps the entire industry by providing the manufacturers and consumers with a method to evaluate whether a particular dyno shop has the skills required to complete the job satisfactorily. These days dyno shops are so commonplace that the average consumer has no way to tell the good tuners from the one's who simply could afford the payments to own the dyno. We are proud to be building this network of tuners and we are exceptionally proud of Glenn Campbell for putting forth the effort to become the first international student to obtain our credentials."
