

## **Windshield Repair Forum Passes 10,000 Post Milestone**

*Windshield Repair Technicians Share Valuable Information on Windshield-Repair-Forum.com*

Eugene, OR ([PRWEB](#)) March 7, 2005 -- With windshield repair companies and technicians from all over the world contributing, the Delta Kits windshield repair forum (<http://www.windshield-repair-forum.com/>) has become the most popular site on the internet for those wanting to learn everything there is to know about the windshield repair business.

The importance of value added services is a hot topic in the automotive industry today, and one of the most popular add on services is windshield repair. The Delta Kits forum allows users to ask questions about various brands of equipment, what it takes to get started, how to market this business, and other important questions. The Delta Kits forum is a great help to owners and managers of automotive related businesses, interested in improving their bottom line.

Perhaps the most refreshing aspect of the Delta Kits windshield repair forum, is the objectivity that is often absent when contacting suppliers of windshield repair equipment. Most individuals who post information on the forum are technicians and small business owners currently engaged in the business of repairing windshields and do not represent any particular supplier.

Delta Kits, Inc. was incorporated in 1984 and is headquartered in Eugene Oregon. An international supplier of windshield repair equipment and supplies, Delta Kits also offers training business startup assistance. The Delta Kits forum may be accessed directly at [www.Windshield-Repair-Forum.com/](http://www.Windshield-Repair-Forum.com/).
